Mr. Carroll Chatham
70 Fourteenth Street
San Francisco 3, Calif.

Dear Mr. Chatham:

George Houston of the Kreuger Stone House of this city mentioned to me some time ago that you were hoping to produce considerably larger cut stones, starting in August of this year.

The largest stone cut from your synthetic crystals that we have seen is one that George Marcher had of .87 carat. Have any stones of larger size been cut? If not, do you expect to have larger stones later?

Any comments that you would care to make on this subject would be appreciated. I am enclosing a self-addressed envelope for your convenience.

Sincerely yours,

GEMOLOGICAL INSTITUTE OF AMERICA
